Who are you?

Describe who you have been and who you want to be. *(270-320 chars)*

Your experience, what brought you to Coding, Who you want to be in your life.

I started to teach my self to code about a year ago. It was just after I shut down my first startup, because we couldn't deliver our product (web app). So, I decided to learn to code. My first course was teaching the basics of HTML, CSS and JS (from coursera)

Describe yourself in THREE WORDS:

1. Genius
2. Entrepreneur
3. Realist

YOUR PRO - or point of strength

1. I'm able to learn new thing fast
2. I'm loyal and I commit to long-term goal
3. I can manage and lead complex projects

YOUR CONS- or point of weakness

4. I don't like to be on the spotlight
5. I need a lot of time in order to trust someone
6. It hard to change my mind

WHY SHOULD A COMPANY HIRE YOU? Convince me

(Try to use the same Tone Of Voice - ToV - you would use in a formal application)

I'm able to right quality and clean code. I can take full ownership of my tasks and work without the need for guidance. I can understand what matters on the business side. I'm loyal and I can

commit to long-term goals.
